# About Us

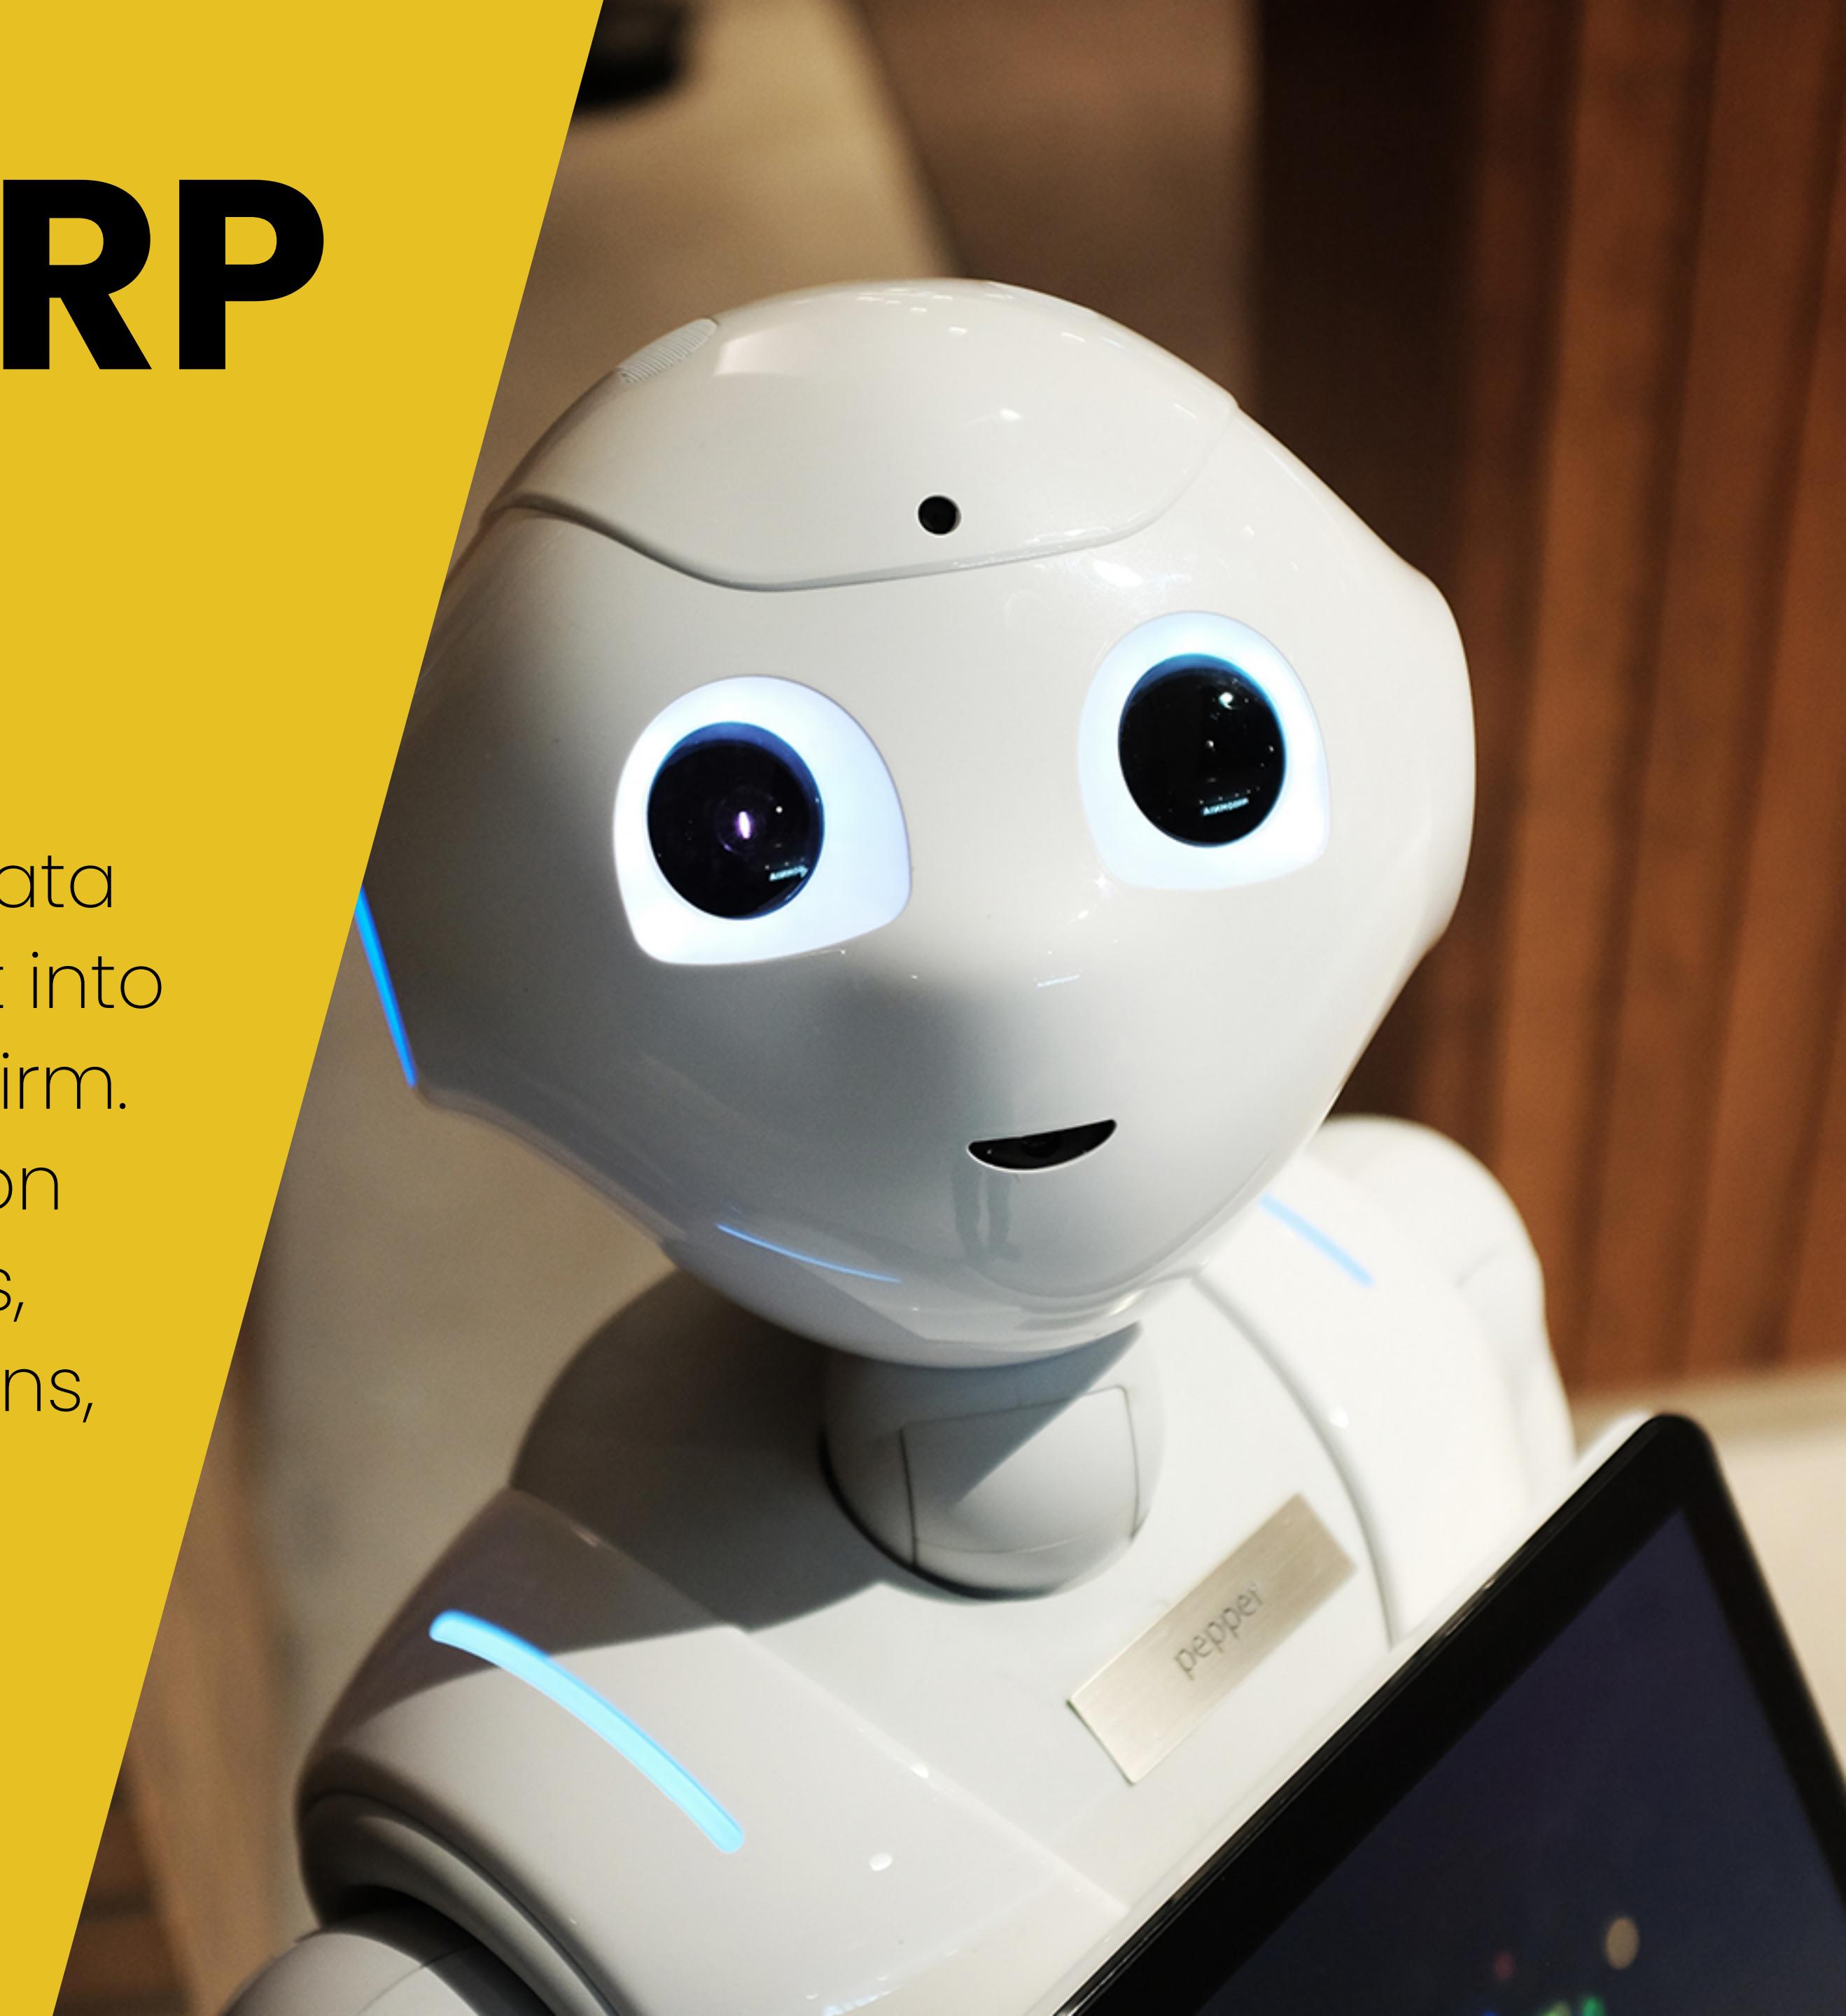

Explore and Do Technologies is a software development company located in India and the United States that specializes in automation, digitalization, and digital marketing.

We aspire to identify and satisfy the evolving needs of businesses and to harness the power of the internet to facilitate businesses in their growth and culture, both online and offline.

# What is an ERP Software?

Enterprise resource planning software pulls data from several departments and summarises it into a single source of truth that helps the whole firm. ERP technologies integrate specific information and critical KPIs from a wide range of sources, including finance, human resources, operations, manufacturing, sales, and marketing.

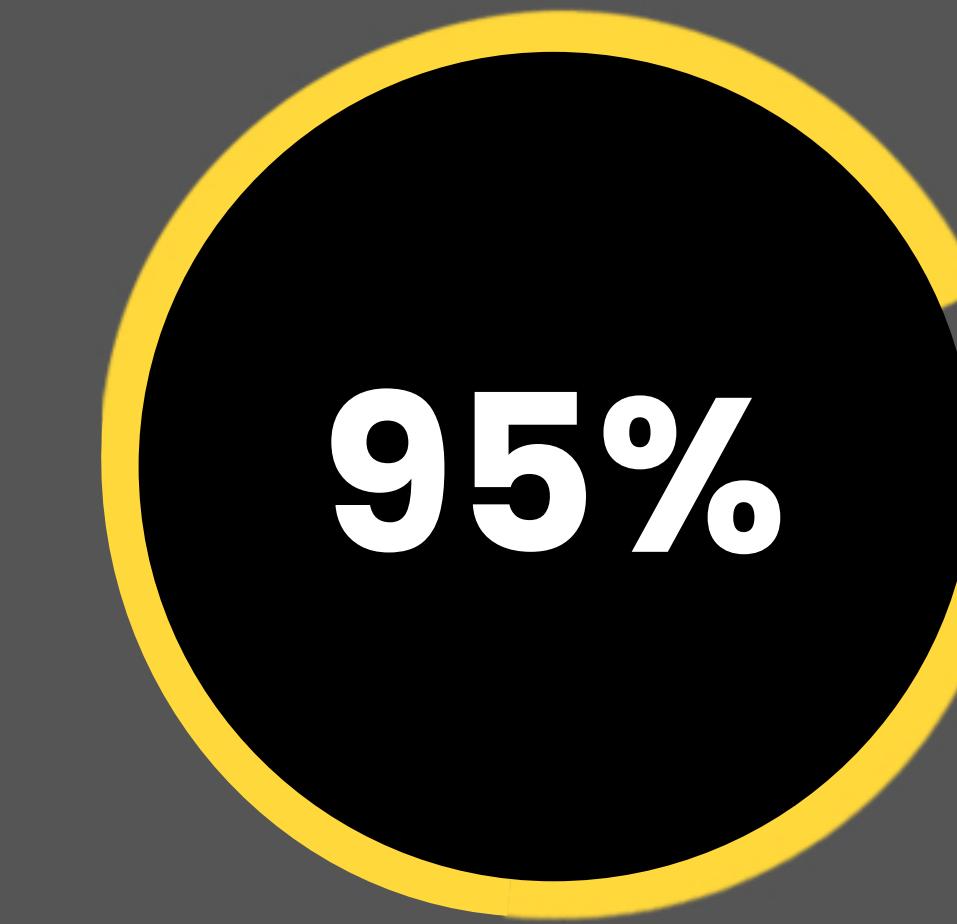

# E&D 360

Our foremost goal is to deliver the best quality products or services to our clients because when their business succeeds, we succeed. We believe in more valuable and less intrusive methods in which loyal clients are earned rather than bought.

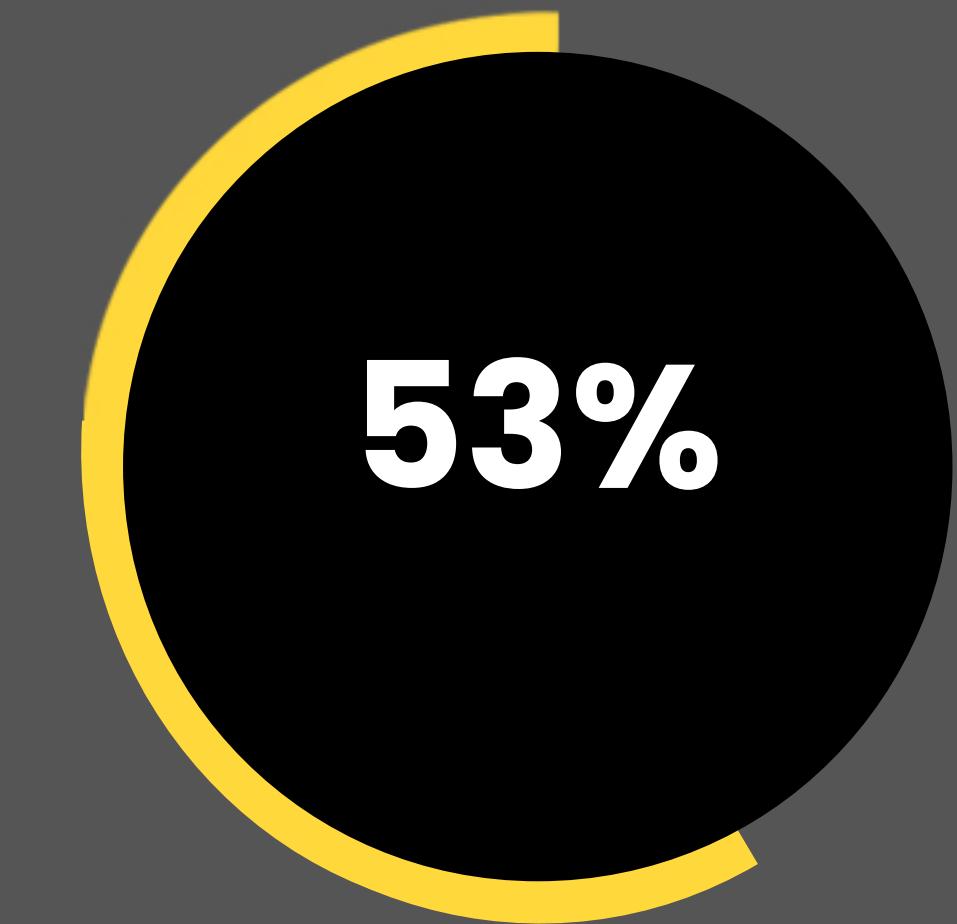

# ERP

Choosing the finest ERP to serve an organization's needs may be very difficult. But working with it will simplify your process and make you feel easier. Given the variety of ERP solutions on the market, it is important to understand how to pick the best one and implement it effectively. Nowadays, ERP systems are essential for all types of organizations. The overall statistics for ERP demonstrate the present state of the market for ERP systems globally.

95% of businesses achieve major improvements after using ERP by reducing process times, increasing collaboration, and centralizing enterprise data.

ERP is viewed as a high-priority investment industry by 53% of firms worldwide.

The global ERP software market is expected to reach \$78.40 billion by 2026, expanding at an 11 percent CAGR between 2020 and 2026.

# 01.

## Paperless Onboarding

Create an onboarding experience that supports your company's image and enables new employees to become productive fast from wherever they work, all while significantly reducing your manual paperwork.

# 02.

## Payroll Management

E&D 360 maintains all of your employees' financial data in an easy and automated manner. Our payroll management system controls employee salaries, deductions, other conveyance, net pay, bonuses, and pay-slip generation, among other things.

# 03.

## Internal Chat

A one-of-a-kind technique to engage with the team and management while maintaining the privacy between employees and employer.

# Some Key Features of

# E&D 360

04.

## Performance Management

E&D 360 assists supervisors in monitoring and evaluating employees' work. Our objective is to foster an atmosphere in which people can perform to the best of their ability and produce the highest-quality work most efficiently and effectively possible.

05.

## Letter Generation

Tired of manually entering data into Microsoft Word to create letters? It's time for a change. With E&D 360 to design an automated letter-generating procedure. Reduce your document preparation time by hours and satisfy client demands more quickly.

06.

## Attendance Management

It is the system you use to document the time your employees work and the time they take off. A precise attendance and time tracking system saves you time and effort when estimating your workers' working hours. And the best part is that you get all of these features with E&D 360.

# A brief history of ERPs

As computer technology evolved through the 1970s and 1980s, concepts were developed to handle business activities beyond manufacturing, incorporating finance, customer relationship management, and human resources data. By 1990, technology analysts had a name for this new category of business management software—enterprise resource planning.

# Why did we choose ERP as our first product?

We invested a great deal of time and thought only to answer one simple question. What product will address an organization's overall business objectives? The solution we got was E&D 360. New research shows that ERP projects today are much more successful than in the past. Coupled with the fact that cloud ERP software options available in the market today are easier to implement, and keeping in mind all the benefits, there's a real business case for ERP.

In a nutshell, E&D 360 assists businesses in making their lives simpler.

A black and white photograph showing the lower half of two people in business attire. They are shaking hands, with their hands positioned in the center foreground. The person on the left is wearing a dark suit and a patterned tie. The person on the right is wearing a light-colored suit jacket over a white shirt with visible cufflinks. The background is dark and out of focus.
